

Smartship Australia

Tug Handling

The course aims to provide tug handling skills to mariners who aim to become tug masters. These include:

- free sailing and familiarisation with specific tug model
- harbour assisting methods
- handling of small vessels
- making fast at speed
- escort towing
- rotating about a fixed point
- full speed turn
- berthing and unberthing tug
- coming alongside moving vessel and peeling away
- centre lead aft towing
- bow to bow towing
- night operations
- night blackout procedures
- manoeuvring with one thruster
- emergency steering

The content and the value of the course is recognised by the largest tug operators in Australia.

Several Z Drive tug models are available from Smartship library including ASDs, ATDs Rotor Tugs and Voith.

High quality simulator training is guaranteed by a world class tug simulator, by having only 2 trainees per course, and by experienced instructors working as active Tug Masters in Australia.
